

Frequently Asked Questions: Frameless Shower Doors & Enclosures

Why should I choose a Frameless Enclosure?

Frameless doors make your room feel larger and more open. Frameless doors with clear glass show off the beautiful wall tile or marble. The heavy glass provides a feeling of luxury and durability. Cleaning is easier with more glass and less metal-to-glass contact.

What thickness of glass is used?

10mm- 3/8" glass or 12mm – 1/2" glass.

What type of glass is used?

Tempered safety glass

Are there different colors or patterns of glass used?

Clear glass is most commonly used. Frosted or sandblasted glass is popular too.

How long does it take before it is delivered?

Product is shipped approximately 2 weeks from date of order.

When can you measure?

Only when all the tile or marble has been installed.

We know what the finished size will be, why can't you order the shower door based upon these measurements?

There is very little adjustment on custom enclosures. The glass is cut to fit precisely.

Can the doors be installed to swing in towards the shower?

Yes! One of the advantages of a frameless door is that the double acting hinges can swing both inwards and outwards. This is a great advantage in confined areas where there is insufficient room to open the door outwards.

What color of hinges is available?

Chrome/Brass/Brushed Nickel and many other colors available.

How is the pricing calculated?

All custom projects are quoted on an individual basis.

Can you give me a ball park price on a standard door 26" x 72" ?

Please email, fax or call 1-866-789-3338 for quotations
